GLADIOLUS

GLADIOLUS CULTURAL DIRECTIONS

A plot which will produce good vegetables will produce good gladiolous spikes. Select a planting plot as far from trees or buildings as possible. Tree roots rob the ground of moisture and buildings reflect heat.

BE SURE TO DISINFECT THE BULBS BEFORE PLANTING to destroy thrip and to kill certain disease germs. **THRIP** are tiny insects, which damage the flower spike even before it emerges from the plant, they live over winter on the bulbs, unless they are dusted with DDT while in storage over winter.

TO DISINFECT THE BULBS USE ONE OF THE FOLLOWING DIPS:

LYSOL DIP — 4 teaspoonsful of Lysol dissolved in 1 gallon of water. Soak bulbs in this solution 3 hours. Plant while still wet in moist ground.

NEW IMPROVED CERESAN OR CERESAN M- DIP — 1 ounce Ceresan, 1 tablespoonfull of Dreft dissolved in 3 gallons of water. Soak bulbs 15 minutes and plant while still wet, in moist ground. This is a powerful dip and must be handled carefully.

To keep the separate lots separate while dipping, place each separate lot in cloth bag, labeling each bag.

PREPARE YOUR GLAD BED WELL by spading deep and adding plenty decayed cow manure if you can get it, otherwise use a commercial fertilizer, such as **VIGORO**. Plant bulbs 5 to 6 inches deep. Space them 6 inches apart in the row.

Since all people do not kill thrip at planting time, there is danger of getting thrip from other gardens because thrip can fly and are also carried by the wind, so when your glads are about 6 inches high start spraying or dusting to prevent thrip injury.

Make a spray solution dissolving 1 ounce of 50% wettable DDT in 3 gallons of water. If you prefer dusting use 5% DDT in a small dust gun. **SPRAY OR DUST EVERY 10 DAYS** up to blooming time.

W A T E R

Don't expect to grow tall glads with long flower heads unless you give them plenty water. After the flower spikes start emerging, give them a good deep soaking once a week. A light sprinkling actually harms them, as it draws the roots to the hot surface.

Glads are primarily cutflowers. Cut the spike when the first flower opens and develop them indoors. They will open in water, and you can enjoy them indoors a long time. When cutting the spikes leave at least 4 leaves on the plant to develop the bulb for next year.

October is the usual bulb digging month. Lift the bulbs with a spade. Cut the stem off close to the bulb. Dry them in shallow boxes or trays until dry enough to remove the old bulb and roots, then dust the cleaned bulbs with 5% DDT and store in cloth bags, screen bottom trays or shallow boxes in coolest place you have but they dare not freeze.

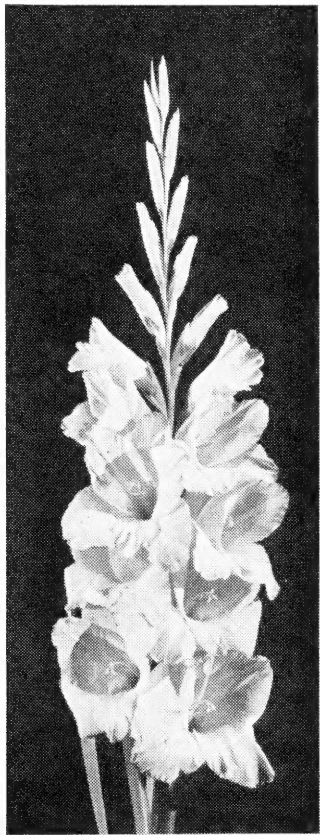

ALL THESE DIPS, SPRAYS and DUSTING MATERIALS ARE POISON !

1953 Introductions

EXOTIC

430 (Lins 1953)

Ruffled delicate soft buff salmon, blending to a prominent pure soft blush white heart. One of the most refined gladiolus we know of.
From its famous parent TREASURE ISLAND it has inherited the faculty of producing good plants with good flower heads with large wide open, well attached and perfectly placed bloom. Blooms midseason and is a good propagator.
Quote from report: "Height 56 inches; flower head 22 inches; 20 buds; 8 open; 6 in color; excellent substance. Much admired by everyone."

WHITE TOWER

WHITE TOWER

501 (Lins 1951)

Early blooming giant white with vivid pink blotch. ONE OF THE THREE VARIETIES, OUT OF HUNDREDS TESTED BY THE NATIONAL TRIAL GROUNDS IN 1951, TO RECEIVE THE HIGHEST RATING.

Produces long flower heads with 7-8 huge wide open, well attached florets of heavy substance, on tall always straight plants. Experts proclaim WHITE TOWER one of the best blotched whites. It is likely to become a leading show flower and commercial.

We sold out early last year and will likely sell out early again this season. Supply of large bulbs limited.

"One of the big and pleasant surprises of last season was **Coral Gables**. What a beautiful color and what lovely harmony in the color pattern. We have stiff competition in pinks, having 22 pinks to compare it with them. This makes the second Lins pink to make the grade to go into our list of **top favorites**, right through tough trials and heavy competition. That other being **Treasure Island**. Silver Court and Marqueeeta have also made the "Favorite" list. **BLONDIE** looks like the most promising of all on trial." L. P. Murphy, Ohio.

SEEDLINGS

WE GROW MANY THOUSANDS OF SEEDLINGS EACH YEAR, produced from hand polonized crosses, using the best breeding stock available from all over the world.

Inasmuch as we have a new lot of seedlings coming on each year, which must be planted and then checked at blooming time, we must make selections from the first blooming. If we would grow them again, we would undoubtedly find as many good ones in the second blooming as we did in the first blooming, therefore there are many wonderful seedlings in our seedling mixture.

At digging time we take out the very small percentage tagged for future consideration. All the rest are lifted and mixed together in one grand 4X seedling mixture.

We had so many requests for strictly seedlings, that we are offering them this season.

Should you find one worthy of naming, which is not at all unlikely, that seedling is your property, to do with as you choose.

SENSATIONAL "GOSLING" DRAGONS

Mr. Gosling spent many years to produce this sensational new type gladiolus. If you are looking for something entirely different or want to use something sensational in your own hybridizing profit by Mr. Gosling's years of preliminary work. AVAILABLE SUPPLY OF BULBS IS SMALL — ORDER EARLY. No discounts.

WHITE DRAGON — Globular creased and crinkled florets of heavy texture in ivory white with a pink dot deep in the throat. The complex spurs of the clustered bloom give an appearance of doubleness, making it a rare delight for floral arrangement and corsage work. \$5.00 each any size. King size Bts. \$1.00 ea.

CARNIOLA — A miniature glad that resembles a carnation, with a sheaf of tiny petals in yellow flecked with red. Bulbs are tiny and full grown bulbs are only 1 inch across. \$10.00 each—any size.

RELUCTANT DRAGON — Next to White Dragon, this is the most beautiful of the Dragons. An attractively ruffled and scantily spurred face up in salmon, with a yellow throat. Long flower head with 15-18 buds with 5-7 open.

Any size bulb \$5.00

MOTHER DRAGON — A lightly spurred and long flower headed salmon pink face up seed bearing Dragon. This and Fairy Dragon are the only satisfactory seed bearing Dragons. This one makes large pods filled with fat fertile seeds, when crossed, or will even do well when left to itself.

Small bulbs. \$5.00

FAIRY DRAGON — Fairy Dragon is the key to a Fairyland of new shapes and types of Dragons, for it is one of the only two seed bearing Dragons. Usually it bears elfin needle spurred cupped florets in lavender pink but on occasion it makes creased fluted petals like Grey Dragon. L \$1.00; M 75c; S 50c

GREY DRAGON — This orchid type glad makes giant sprawling florets, folded and spurred in lavender grey smoke. The oddest gladiolus you have ever seen. Invaluable for dark accents in floral work. L \$1.00; M 75c; S 50c

SHAGGY DRAGON — A large bright salmon orange double. Not as double as Carniola or Multipetal but having 12-15 petals in cupped face ups.

L 75c; M 50c; S 25c

PINK SPURS — An odd taller Dragon with mottled spurred buds that open to coral pink cups facing up. A weird and haunting beauty. L 75c; M 50c; S 25c

DINOSAUR — This variable, ranging from sprawling blossoms like Grey Dragon to spurred double florets, but always in a bright orange pink. L 75c; M 50c; S 25c

PACIFIC STRAIN OF DELPHINIUM HYBRIDS

This strain of Delphinium has become a standard for the highest quality in Delphinium all over the world. Instead of making extravagant claims, we would like to let our flowers speak for themselves when you grow them.

Experiments have proven that young plants bring far better results than one or two year clumps, which, sometimes are quite exhausted upon arrival and it takes a year to get them re-established, during which time the flowers are not at their best.

STRONG YOUNG PLANTS SHIPPED WITH SOIL ON THEIR ROOTS BRING FAR BETTER RESULTS in a shorter time. You can expect good bloom the first summer.

ASTOLAT — A new creation. Color variations extend from pale blush thru all shades of lilac pink to deep raspberry rose with large fawn and black bees in contrast.

BLACK KNIGHT — Darkest violet. The velvety individual florets are 2½ to 3" in diameter of beautiful round form. Very long flower head. A true show flower with black bees.

CAMELIARD — A clean lavender self with white bee. Possessing classical perfection of form. The individual flowers are round and attain 3" in diameter.

GALAHAD — The greatest achievement in giant whites. Has all the qualities expected of a fine Delphinium. The clear white flowers with white bees are of large size, often reaching 3" in diameter combined with glistening texture.

SUMMER SKIES — Light heavenly blue of the summer sky with the white bees representing fleecy clouds. As a class this is the finest blue Delphinium in existence.

Your choice of varieties. Arrival in good growing condition, assured.

Good young plants — 4 for \$2.00 — 8 for \$3.50 — Postpaid U.S.A.

"Saw your **DELPHINIUM** and **PEONY** display at the Minnesota State Peony Show. They were simply gorgeous." — Mrs. M. A. Luschen, Minnesota.

Giant Hybrid Amaryllis

This season we are offering the finest strain we have ever seen. Flowers are immense, composed of broad well rounded overlapping petals of the most perfect form, ranging in color from pure white ground with varied markings of rose, red and crimson, to the richest self colors of scarlet, crimson, bright red, cherry and almost maroon.

Amaryllis are among the most gorgeous of all flowers and are easy to grow. Wonderful for pot plants or garden. They bloom soon after planting. The bulbs are good for years. Cultural directions included.

These come in mixture only.

Large Bulbs 65c each — 3 for \$1.75

"First I want to tell you how pleased I am with the AMARYLLIS I got from you. They were gorgeous. One bulb had two flower stems with 4 flowers on one and 2 on the other. I am sure happy about them." — Dr. Bruce L. Ross, Nebraska.

"The AMARYLLIS you sent me are beautiful." — Mrs. A. L. Berry, N. H.

Gloxinias

Here is another gorgeous pot plant easily grown from our bulbs. The modern Gloxinia has gained great popularity the last several years and rightly so. The large wide open flowers are beautiful beyond description and they bloom a long time. A good blooming Gloxinia plant sells for around \$3.00, you can grow your own for less than 40c. Cultural directions included.

PRINCE ALBERT — Darkest violet, beautifully frilled.

RIO DES ROUGES — Brilliant crimson scarlet, huge flowers beautifully frilled.

TIGRINA (Spotted and stained hybrids) Large bloom with a short throat.

Entire blossom veined and spotted, in a mixture of pink, blue, purple and red markings on white. Very beautiful.

Large Bulbs 40c each — 3 for \$1.10

Tuberous Begonias

Giant Double Camelia Type.

Another bulb easily grown and which is tremendously popular. The large double beautifully formed camelia type is available in many grand shades and colors. The foliage is also beautiful. They love light shade and are perfect for flower boxes or beds. If you have not grown these by all means grow some this summer. Cultural directions included.

Choice of: Yellow, Pink, Scarlet, Crimson, Rose, Orange, White, Salmon.

Large Bulbs 30c each — 4 for \$1.10 — 12 for \$2.95

Calla Elliottiana

The Yellow Calla

The yellow Calla makes a very beautiful and graceful pot plant and also is a very effective garden plant. It has beautiful shiny mottled leaves and the brilliant deep yellow bloom is held well above the foliage. Does not grow as large as the White Calla, therefore makes a more desirable pot plant even when not in bloom. Cultural directions included.

Large Bulbs 50c each — 3 for \$1.25

White Regal Lily

One of the finest and most beautiful of all lilies and certainly one of the easiest to grow, thriving in a great variety of soils.

Vigorous grower attaining a height of 4 ft. or more with as many as 20 blooms on established plants. The new WHITE REGAL is a mutation from the regular Regal Lily. The older Regal Lily had an objectionable wine color on the outside. The NEW WHITE REGAL is pure white with a yellow throat. Cultural instructions included.

Large Bulbs 1 for 40c; 3 for \$1.10; 10 for \$3.00

POSTPAID U. S. A.

Gorgeous Peonies

LINS PEONY ORIGINATIONS are found in most distinguished collections. Some of our originations are regarded by Peony experts, as among the world's best. Peonies are so hardy, they usually outlive the planter. Since such wonderful new varieties are available today, the wise planter does not plant discarded varieties which are offered at bargain prices.

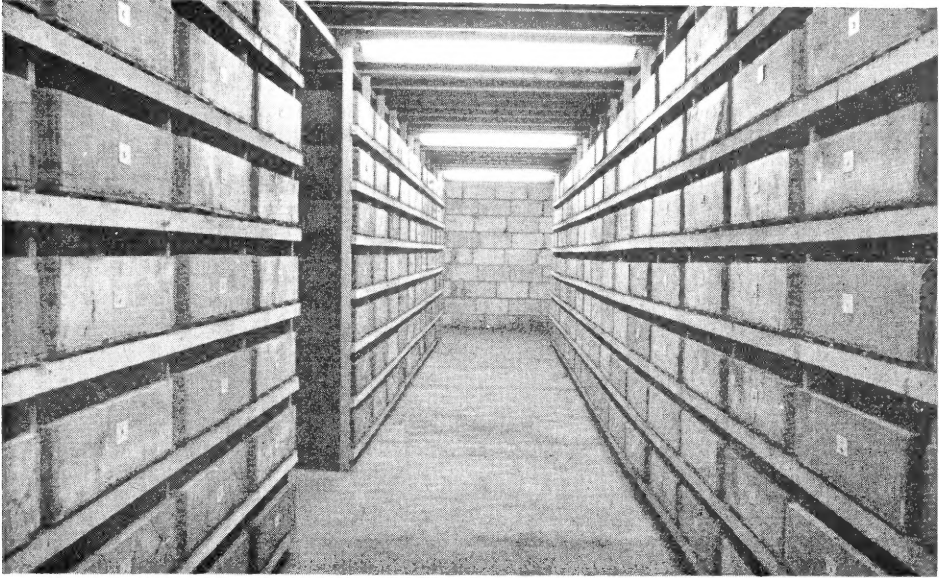

It takes 12 to 15 years to propagate a new peony, therefore they cost from \$5.00 to \$20.00, however, the cost figured over a life time of pleasure is a good investment.

DURING THE PEONY BLOOMING SEASON THE PEONY IS THE KING OF ALL FLOWERS. Some are as fragrant and as beautiful as the finest rose and need no special care.

VALUABLE PEONY BOOKLET AVAILABLE

A peony booklet issued by the American Peony Society, containing valuable material on peonies of all types and which fully describes and prices our peonies, is available from us for 25c, which price will be refunded with your first peony order.

From J. W. Harris

SNOWCLAD — A taller and better finished SIERRA SNOW. This one will grow 72 inches tall with 30" flower head. Opens 12 ruffled and fluted florets with 10 in color. Achievement Medal winner in 1952.

GOLD BOND — Ruffled, heavy textured rich medium yellow. Grows 66" tall with 26" flower head of 20 buds. Opens 8 with 6 in color. No throat marks.

ALLAH — A huge, richer, much improved Vagabond Prince without the scarlet throat feather. Ruffled and needlepointed. Opens 8 with 6 in color on a 56" spike with 20" flower head of 19 buds.

BLUEBERRY — A fine addition to the medium blue class. Grows 56" tall. Opens 8 slightly ruffled bloom with 6 in color on a 19 bud flower head. Almost a self color.

GOLDEN DIANA — Ruffled, heavy textured clear deep yellow without any throat marks. Grows 60" tall with 24" flower head of 20 buds. Opens 9 with 7 in color. Claimed to be the best of many new yellows tested in 1952.

ROSIE O'GRADY — Said to be the swellest medium rose with slightly deeper throat. Large 5½ inch florets, ruffled bloom of heavy texture. Grows 56" tall. Opens 8 with 6 in color on 19 bud flower heads. Considered a knockout in the rose class.
